QA Automation

SUMMARY

Experienced Full Stack developer able to implement tasks of any complexity and coach others. Experienced in various areas, from development to team leadership — spanning Magento and Laravel backends, React and Knockout frontends, QA automation, and DevOps delivery.

EXPERIENCE

FULL STACK DEVELOPER

Hidden Hint. Poland, Warsaw | Jan 2024 - Aug 2024

Project: E-commerce Platforms for Digital Products

Full stack development across e-commerce platforms for digital products with QA automation and DevOps responsibilities.

Responsibilities

- Delivered full stack features across Magento and Laravel projects.
- Built QA automation — unit, integration, and UI tests for critical business flows.
- Handled DevOps tasks across concurrent client projects.
- Used Alpine.js and Tailwind CSS for modern frontend enhancements.

Tools & Technologies: Magento 2, Laravel, PHP, PHPUnit, JavaScript, Alpine.js, Tailwind CSS, Docker.

PHP BACKEND DEVELOPER / SCRUM MASTER

Puravita (Online Pharmacy). Switzerland, st. Gallen | Apr 2022 - Dec 2023

Project: National Online Pharmacy (Switzerland)

Online pharmacy platform with microservices, AWS integrations, and international team collaboration.

Responsibilities

- Implemented microservices for Magento 2 and AWS integrations.

- Introduced feature toggles and trunk-based development practices.
- Drove page-speed optimizations across storefront and checkout.
- Integrated Agile and Scrum practices as Scrum Master.
- Collaborated with colleagues across cultures and languages (German and English).

Tools & Technologies: Laravel, Magento 2, PHP, AWS, JavaScript, Knockout.js, MySQL, Docker.

| MAGENTO FULL STACK DEVELOPER / TEAM LEAD

Lindenvally (E-commerce websites). Belarus, Minsk | Feb 2021 - Apr 2022

Project: E-commerce Solutions (Outsourcing)

Magento-based client projects with internal meetups on design patterns, best practices, and delivery processes.

Responsibilities

- Implemented Click & Collect and custom checkout flows for client storefronts.
- Hosted internal meetups on design patterns, best practices, and team processes.
- Worked as Manager and Team Lead alongside hands-on development.
- Used Alpine.js for interactive frontend components on Magento 2.

Tools & Technologies: Magento 2, PHP, JavaScript, Knockout.js, Alpine.js, MySQL, Elasticsearch, Docker.

| MAGENTO FULL STACK DEVELOPER

BelVG (Online Cosmetics Store). Belarus, Minsk | Jun 2020 - Feb 2021

Project: Online Store for Cosmetics

Responsibilities

- Built API integrations and payment gateway integrations.
- Implemented custom checkout flows.
- Participated in Magento migration efforts.

Tools & Technologies: Magento 2, PHP, JavaScript, jQuery, Knockout.js, SASS, MySQL.

| LARAVEL / REACT DEVELOPER

iTechArt Group (Surveys Generator). Belarus, Minsk | Mar 2019 - Mar 2020

Project: SaaS Platforms and Startups

E-commerce startups and enterprise applications with strong focus on integration tests and performance.

Responsibilities

- Developed backend logic for early-stage SaaS and e-commerce startups.
- Wrote integration and unit tests; implemented site performance optimizations.
- Built UI with React and Redux; worked with AngularJS and Vue.js on client projects.

Tools & Technologies: Laravel, PHP, React, Redux, AngularJS, Vue.js, MongoDB, PostgreSQL, MySQL, PHPUnit.

EDUCATION
